SUMMARY

Shubham is a Cloud & DevOps Engineer with 1+ year of hands-on experience in scalable deployments, automation, and cloud-native architecture. Has Proven ability to streamline CI/CD pipelines, implement Infrastructure as Code, and optimize systems for performance & cost. Proficient in tools like AWS, Azure, GitHub, Docker, and Terraform. Improved deployment efficiency and reduced manual intervention through IaC. Known for bridging development & operation with a strong understanding of system reliability, automation, and cost optimization. Passionate about delivering secure, resilient, and production-ready cloud solutions. Eager to challenge existing approaches and seeking better ways to deliver secure & reliable systems.

EDUCATION

Master of Science – MSc (Cloud Computing) ***Sept 2024 – Sept 2025***
University of East London, London.
Modules: Cloud Computing, AI, Computer Security, Data Analytics.

Bachelor of Technology – B.Tech (Information & Technology) ***May 2020 - May 2024***
Charotar University of Science and Technology, India. **GPA: 3.08/4.00**
Modules: Mathematics, Basics of Engineering, Web Development, Python, DevOps, CN.

PROJECTS

Scalable 2-Tier AWS Infrastructure with Terraform ***June 2025 - July 2025***

- Applied Infrastructure as Code principles to automate the provisioning of highly available web and database tiers, enhancing deployment repeatability and reducing manual setup time by 70%.
- Secured backend resources in private subnets with NAT access while enabling public tier through Load Balancer and Bastion host for controlled SSH access.
- Managed Terraform state remotely via S3 and implemented DynamoDB state locking to ensure safe concurrent infrastructure updates.
- Enabled modular deployment and cost optimization by parameterizing environment-specific variables and using version-controlled Terraform modules.

Tech Stack**:** Terraform, VPC, EC2, RDS (MySQL), ALB, Bastion Host, Auto Scaling, S3 Backend, DynamoDB, VS Code

Scalable 3-Tier Azure Deployments ***June 2024 - Aug 2024***

- Designed and deployed a highly available 3-tier web application architecture on Azure using Load Balancers, VM Scale Sets, and isolated subnets.
- Implemented Azure SQL for backend data storage, achieving a 40% improvement in query performance through indexing and resource tuning.
- Automated infrastructure provisioning with ARM templates, reducing deployment time and cloud costs by 30%.
- Strengthened network segmentation and applied security controls across application layers, improving compliance and security posture.

Tech Stack**:** Azure Virtual Machines, Azure Load Balancer, VM Scale Sets, Azure SQL, NSG, VNETs

On-Demand Infrastructure Automation ***Apr 2023 - May 2023***

- Built a self-service platform for automated Azure infrastructure provisioning, reducing manual setup time by 80%.
- Integrated Terraform with GitHub Actions CI/CD: PR triggers plan, approvals trigger apply, enabling safe, auditable deployments.
- Developed modular, parameterized scripts to provision VMs, subnets, storage, and dependencies without prerequisites.
- Applied GitOps principles and version-controlled state management to improve collaboration, compliance, and cost efficiency.

Tech Stack**:** Terraform, GitHub Actions, Azure VMs, VNET, Storage Accounts, CI/CD, GitOps, PowerShell, VS Code

End-to-End CI/CD Pipeline Implementation ***Dec 2023 - Jan 2024***

- Built a robust CI/CD pipeline using Azure DevOps to automate build, test, and deployment stages, reducing deployment cycles by 40%.

- Containerized applications using Docker and deployed to Kubernetes clusters for scalable multi-environment delivery.
- Provisioned infrastructure with Terraform, cutting environment setup time by 50% and improving reproducibility.
- Conducted functional validation across 100+ test cases, achieving a 95% pass rate, ensuring deployment stability across environments.

Tech Stack**:** Azure DevOps, Docker, Kubernetes, Terraform, Git, Linux

EXPERIENCE

Gen AI Developer Intern – Tata Consultancy Services (On-site) ***Jan 2024 - May 2024***

- Designed and automated deployment workflows using Python scripts, improving infrastructure provisioning speed and reducing manual workload by 25%.
- Performed root cause analysis on critical incidents, reducing repeat system failures by 30% and improving overall uptime.
- Contributed to cloud migration planning and execution, ensuring secure transitions with effective risk mitigation strategies.
- Provided ongoing production support, minimizing downtime and supporting stable system operations during development sprints.
- Collaborated with product stakeholders to align GenAI tool enhancements with business and engineering objectives.

Cloud Infrastructure & Security Intern - Celebal Technologies (Remote) ***May 2023 - July 2023***

- Architected and managed Azure Hub-Spoke network, enhancing security and reducing latency by 20% across internal services.
- Configured VNET Peering, VPN Gateways, and NSG rules to strengthen cloud infrastructure security posture.
- Led initiative to refactor legacy systems into containerized microservices, cutting deployment time by 40% and simplifying releases.
- Integrated CI/CD pipelines using Azure DevOps, boosting build and deployment efficiency by 30%.
- Collaborated with infrastructure teams to optimize server configurations, reducing resource overhead and improving response times.

TECHNICAL SKILLS

- **Cloud Platforms:** Microsoft Azure, Amazon Web Services
- **DevOps & Automation Tools:** Azure DevOps, GitHub Actions, GitLab, Terraform, Docker, Kubernetes, ARM Templates
- **Programming & Scripting:** Python, Linux, Shell Scripting, C++
- **Infrastructure & Networking:** Azure NETs, VPN Gateway, NSG rules, Load Balancer, VM scale sets, Azure SQL, Azure Monitor
- **CI/CD & Testing:** CI/CD Pipeline Creation, Manual & Functional Testing, Infrastructure as Code (IaC), Multi-environment Deployment
- **Version Control & Collaboration:** Git, GitHub, GitLab

SOFT SKILLS

- Team Collaboration, Critical Thinking, Time Management, Communication, Problem Solving, Adaptability, Work under pressure

ACHIEVEMENTS

- Awarded Certificate of Appreciation at Tata Consultancy Services for exceptional contributions to the team.
- Earned 2nd Price for exception contribution in a day long Hackathon by GitHub Gamma Club.

CERTIFICATIONS

- Microsoft Azure certified: AZ-900, DP-900, AI-900, SC-900, MS-900, PL-900.
- GitHub Foundation.

REFERENCE

- Available upon Request.
